

MANOJ M

AI ENGINEER | MACHINE LEARNING ENTHUSIAST

mmanoj7708@gmail.com | linkedin.com/in/manoj-m-kct | github.com/mmanoj770

SUMMARY

Artificial Intelligence and Data Science student with hands-on experience designing scalable AI systems, including Retrieval-Augmented Generation (RAG) pipelines, AI agents, and machine learning models. Experienced in backend API design and executing advanced data processing pipelines. Looking to apply engineering and programming skills to develop efficient, data-driven enterprise solutions.

TECHNICAL SKILLS

- Languages:** Python, Java, C++, SQL
- ML & AI:** Scikit-learn, TensorFlow, PyTorch, AI Agents, RAG
- Tools & DBs:** FastAPI, MySQL, FAISS

PROFESSIONAL SKILLS

- Problem Solving
- Analytical Thinking
- Technical Documentation
- Team Collaboration

PROFESSIONAL EXPERIENCE

Intern, Forge Innovation & Ventures

July 2026 - Present

AI / Software Engineering Intern

- Designed and developed AI-powered software modules, integrating machine learning models into production-ready backend services built with Python and FastAPI.
- Collaborated with cross-functional engineering teams to build and deploy a Retrieval-Augmented Generation (RAG) based document intelligence feature.
- Partnered with product stakeholders to translate business requirements into scalable, well-documented technical solutions.

MySQL Intern, Independent Internship

May 2026 - July 2026

- Designed and optimized relational database schemas to support efficient data storage and retrieval for internal applications.
- Wrote and tuned complex SQL queries, improving query performance for reporting and analytics workflows.

PROJECTS

Enterprise Discovery Agent | AI Infrastructure Intelligence Platform

June 2026 - July 2026

This project develops an AI-powered platform that discovers enterprise systems from PDFs, DOCX, XLSX, and image files using OCR and document intelligence. It utilizes a Retrieval-Augmented Generation (RAG) pipeline via the Claude API to ensure precise, confidence-based validation while reducing hallucinations.

Dengue Predictive Model

Jan 2026 - Feb 2026

Built a machine learning pipeline to predict dengue outbreak risk using historical epidemiological and climate data. Applied extensive feature engineering and data preprocessing techniques to improve model accuracy and generalization for reliable forecasting.

EDUCATION

B.Tech, Artificial Intelligence & Data Science

Sept 2024 - May 2028

Kumaraguru College of Technology | CGPA: 8.05

ADDITIONAL INFORMATION

- Certifications:** Google AI-ML Virtual Internship, Machine Learning Specialization - Coursera.
- Activities:** Executing a highly structured ten-month technical learning plan targeting advanced AI/ML capabilities; solved 100+ LeetCode problems with a daily focus on Data Structures and Dynamic Programming.
